Groupings based on an Average Linkage Cluster Analysis algorithm.

Number of groups: 15

Next:

Cluster A

Label:

Description

Fosters awareness of his/her own personal responsibilities and the respect of reciprocal rights/obligations in building shared and collaborative knowledge. (56)

Discussion

- Inventory of statements we have and how they should be clustered according to you
- Descriptive label & sentence; splitting, lumping, moving is allowed but .. (round 2)
- Your expertise needed to arrive at sensible labels and descriptions
- No prioritising (yet ...)

Some tips

- be precise (avoid vagueness)
- be specific (avoid being overly general)
- descriptions aren't true or false (unless you want to report on the state of the art)
- they are more or less useful (with respect to a goal, context!)
- clusters should not overlap (exclusiveness)
- clusters should be jointly exhaustive

Now: describe and discuss!
